Spacing, radius, border, focus

PROPOSED SCALE — PROTOTYPE USES 2–44PX AD HOC

--space-1	4px
--space-2	8px
--space-3	12px
--space-4	16px
--space-5	20px
--space-6	24px
--space-8	32px
--space-10	40px

--radius-0 · 0
Everything: buttons, fields, cards, modals.

--radius-round · 50% / 999px
Only avatars, notification dots, snippet pills.

--focus-ring · 3px orange, offset 2px
:focus-visible everywhere; inset −3px in nav bars. Fields use inset 2px orange shadow.

--border · 1px ink · --border-accent 4–5px
Lines are the structure; no shadows anywhere. Thick left/bottom edge marks the active nav item.

Font-size switcher. The prototype sets `html{font-size:16px}` and swaps to 18 / 20px via `.fs1` / `.fs2`. Every size above is in rem, so this keeps working — except padding, which is px in the prototype. Recommend spacing in rem too so touch targets grow with text.
